

### III. CONCLUSION

Although the Joint Parties agree with MSCI and LQSS that it is important to resolve the MSS/RDSS licensing issues as expeditiously as possible, and to develop a sharing proposal, they strongly disagree with the MSCI/LQSS effort to establish a structural framework that is inherently exclusionary. The fact remains that only the spectrum assignment and qualifications proposals made by the Joint Parties are reasonable, fair to all parties, and consistent with the Commission's stated goal of creating an MSS/RDSS industry that is characterized by a policy favoring competitive multiple entry by service providers. The spectrum assignment portion of the MSCI/LQSS plan is misguided in concept, and realistically incapable of implementation. MSCI and LQSS's call for adoption of rigid qualification standards is inconsistent with their spectrum assignment proposal, and produces anticompetitive effects. Both aspects of the MSCI and

LQSS proposal should be rejected in favor of the corresponding proposals made by the Joint Parties.

Respectfully submitted,
